An Important Matter-How It Affects

at Work on the Case-Police Court

Council was held last night to receive a petition from Messrs. Frank & Sons in regard to some additional work on the overall-factory, now under construction. There were present Messrs. John O'Brien (president), Matthew Morton, G. R. Green, John E. Utz, James T. Abbott, R. L. Patram, R. O. Randlett, W. T. Hart, W. B.

The principal changes wanted by Messrs. Frank & Sons in the original plans for the building were a metallic skylight for the wooden one, and an improved sewer arrangement, the whole estimated to cost over the old, \$719. The discussion which followed was pretty general and a bit spicy. The opinion prevailed that the overall people were asking a very great

The Manchester Railway and Improvement Company yesterday took one of their cars from the Hull-street line. There are now but three cars on the street runare now out three cars on the street run-ning from Fourteenth and Main streets and Swansboro. The Council requires the company to make a schedule of 10 min-utes. It is very difficult for three cars to make this schedule, without running at a dangerous rate of speed. Strange as it a dangerous rate of speed, Strange as it may seem, when the Council passed the ordinance requiring a schedule of 10 min-utes, nothing was said of a limit to the speed the cars should run. In Richmond the Richmond Railway and Electric Company is required not only to maintain a ertain schedule, but must not run mora han eight miles an hour. Captain James A. Lipscomb, City En-

gineer, on yesterday afternoon noted the cars, both as to trips and to time beween them, and ascertained that following schedules were maintained by the three cars: Car No. 12, round trip, 30 minutes.

Car No. 20, round trip, 32 minutes. Car No. 2, round trip, 33 minutes. Time between cars, south bound:
Between Cars 12 and 2, 7 minutes,
Between Cars 2 and 20, 11 minutes,
Between Cars 20 and 12, 12 minutes,
Between Cars 12 and 2, 10 minutes, Average, 10 minutes. Time between cars, north bound:

Between Cars 29 and 10, 19 minutes. Between Cars 12 and 2. 11 minutes. Between Cars 2 and 20, 11 minutes. Between Cars 20 and 12, 10 minutes. Average, 10 minutes 30 seconds Captain Lipscomb says the cars on down grades run at a dangerous rate. The citizens, too, are much worked up
